Dear Prof. Vicheva,

I am writing to you as a representative of a group of German Otorhinolaryngologists, which are focused on the diagnosis and treatment of sinonasal diseases and endoscopic endonasal surgery of the paranasal sinus and skull base since many years. We combine clinical work, scientific research and surgical education. Together with Prof. Dr. Werner Hosemann, university of Greifswald, and Prof. Dr. Thomas Kühnel, university of Regensburg, we are performing several international courses for endoscopic sinus surgery, which you can find under [www.fess-course.com](http://www.fess-course.com).

The members of our group are all distinguished with the highest ranking of 3 stars in the „List of best physicians – Sinus Surgery“ from „Focus Gesundheit“.

Together with you we developed the idea and concept to improve the education in ENT and endoscopic sinus surgery, particularly. And to concurrently improve the medical care of Bulgarian patients in this respect.

We want to offer you a cooperation with your Bulgarian Rhinologic Society for 2 years periods consisting of:

- Surgical courses on endoscopic sinus surgery in your country
- Joint scientific clinical research
- Personal education of ENT doctors.

It would significantly enhance the attractiveness of your society for:

- Bulgarian patients in terms of better medical care
- younger ENT doctors in terms of better education
- We can develop as a Center for sinus diseases in addition to the known focus in allergology (Prof. Vicheva).

What do we need: a basic agreement from your side to start with this 2 years cooperation. Details of the scientific agreement would be prepared by Prof. Vicheva and the signatory. To run a surgical course a fundamental precondition is a comparable surgical equipment to perform modern endoscopic sinus surgery. Only with modern equipment it is possible to achieve the good results which we owe the patients. This consists of HD-Videoendoscopy, navigation system, shaver system, documentation, and a full set of hand instruments, e.g. the master set of Sinus Academy in Berlin.

With this background we are able to do life surgery and teach other ENT doctors in Bulgaria as well as to teach colleagues in Germany.

I would be very happy to get a positive reply. With pleasure we can meet in Plovdiv to discuss further details of our cooperation.

With best regards,

Prof. Dr. Rainer Weber
